Project 3: UpDown

Key Technologies: MVC, Express, AJAX, Sequelize, PostgreSQL, Webpack, Github, Heroku

Description

- Players will take turns attempting to play all the cards in their hands by sending valid cards to the discard pile.
- The winner is the first person who has no cards left or when no one can play any valid cards while the draw pile is empty, the player(s) with the least cards wins.
- Cards played must fall within a range of +-1 of the top card in the discard pile.

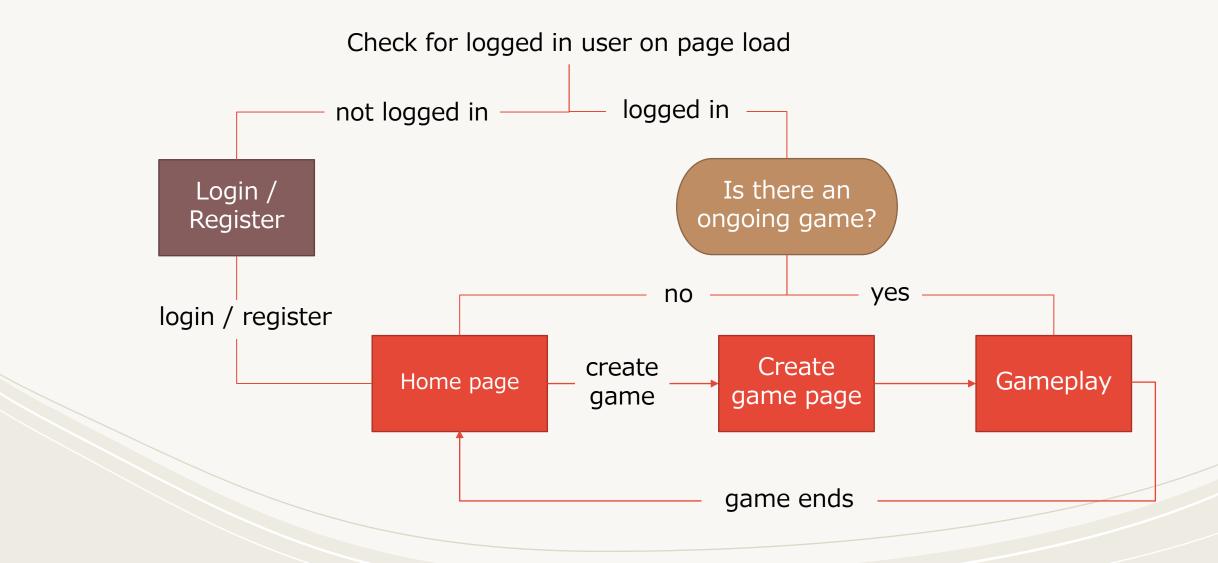

Set-up

- From a poker card deck, set aside 10 cards for the draw pile and 1 card for the discard pile.
- The leftover cards will be divided evenly among each player.

Gameplay

- 1. Start the game by placing the top card of the draw pile face up into the discard pile. Players will take turns placing 1 or more cards that meet the following requirements:
- card(s) value are within the range of +-1 of the top card in the discard pile.
- cards(s) played should be of the same value.
- 2. If a player can't play any cards, skip his turn. If all players skip, flip the top card of the draw pile face up and place it in the discard pile. If the draw pile is empty, then the player who has the least cards in his hand wins.
- 3. When a player plays a card, the 1st card that the player played will be the new discard pile card.
